

SAMBHAV BHARDWAJ

sb2044@srmist.edu.in | 7014757461 | 2027

B.Tech, Artificial Intelligence

Address : VGN southern Avenue

Summary

Motivated AI engineering student pursuing a B.Tech in Artificial Intelligence. Skilled in Python, C, and beginner-level web development, with a keen interest in collaborative projects, problem solving, and continuous learning in the field of AI.

Education

SRM IST-Kattankulathur

B.Tech · Artificial Intelligence

2027

CGPA - 8.47/10

Modern Public School

Class XII - CBSE · PCM · Kota, Rajasthan

2022

Percentage - 75.4%

Modern Public School

Class X - CBSE · Kota, Rajasthan

2020

Percentage - 74.4%

Experience

AICTE EduSkills

AI/ML intern · AI/ML intern

Apr 2024 - Jun 2024

india

Neev Foundation

volunteer · volunteer

Jun 2025 - Jul 2025

Kota Rajasthan India

During my Working Period I organized Community programs, conducting surveys, teaching, Raising Awareness showing my responsibility for the community and the society.

Gen-Y Events

Creative and Content · Creatives and Content Lead

Oct 2024 - Present

SRM University Chennai, India

Working as a Creative designer and Content manager for a university preferred Club.

TEDxSRM

Operation · Operation member

Sep 2024 - Present

SRM University Chennai, India

Working as a operation member for managing the clubs events

TPH

Corporate · Member

Mar 2024 - Present

Showcasing my part as Corporate member for a Blockchain Related CLUB

Projects

Amazon Clone

· HTML, CSS, JavaScript

WEBDEV

Developed a responsive, Amazon-inspired shopping interface using **HTML, CSS, and JavaScript**. Implemented key features such as product listings, category navigation, interactive search, and a dynamic shopping-cart experience. Focused on clean UI design, cross-browser compatibility, and mobile-first responsiveness to deliver a smooth, real-world e-commerce feel.

Animal Identification

· CNN, HTML, CSS, Javascript

ML

This project endeavors to bring out the approach of electronic animal identification with employing of computer vision and deep learning. The basic aim is to create a system that will intelligently label the animals in an image or video to deliver the correct name of the species. Using the advancements in computer vision and deep learning algorithms, ZooNet can identify and classify a wide range of animal species from visual sources such as images. Whether you're a wildlife enthusiast, researcher, or conservationist, ZooNet provides a powerful tool to monitor and protect wildlife populations.

Spam Classifier

· Python, Numpy, Matplotlib

Machine Learning

Built a supervised machine learning model to automatically detect and filter spam messages. Collected and pre-processed text data, performed feature extraction using techniques such as TF-IDF/Bag-of-Words, and trained classifiers (e.g., Naive Bayes/Logistic Regression) to achieve high accuracy. Implemented the solution in Python, evaluated performance with metrics like precision, recall, and F1-score, and deployed it as a simple, user-friendly application.

portfolio-site

personal · HTML,CSS,Javascript

Jan 2026 - Jan 2026

web-development

A personal portfolio website built using **HTML, CSS, and JavaScript**, designed to showcase projects, skills, and contact information in a clean and responsive layout. The site highlights your work with structured project sections, smooth UI interactions, and a simple navigation system. It serves as a central hub for recruiters and collaborators to explore your experience, view your GitHub projects, and connect with you easily.

E-Commerce

· Next.js with Tailwind and typescript

Jan 2026 - Jan 2026

Web-development

A full-stack e-commerce platform built with **Next.js, TypeScript, and Tailwind CSS**, implementing end-to-end shopping functionality. Features include user authentication (login/signup), product browsing, dynamic product pages, reviews, cart management, address storage, and order flow. The application uses server-side rendering for performance, strong type-safety through TypeScript, and a responsive UI built with Tailwind. Designed to be scalable, maintainable, and ready for integration with real payment and backend APIs.

Expense-Tracker

· Next.js with Tailwind and Typescript

Jan 2026 - Jan 2026

Web-Development

A personal finance tracker built with **Next.js, TypeScript, and Tailwind CSS**, enabling users to log expenses, categorize spending, visualize trends, and manage budgets. The app includes authentication, responsive dashboards, dynamic charts, and persistent data handling. TypeScript ensures strict type safety, while Tailwind delivers a clean, fast UI. Designed for clarity, quick input, and efficient expense analysis.

Volunteering

Neev Foundation

Volunteer · Community Development

Jun 2025 - Jul 2025

organized Community programs, conducting surveys, teaching, Raising Awareness

Competitions

Ideathon

3rd Prize · SRM University

Dec 2024

Coding Competition

Special Mentions · IEEE SRM

Mar 2024

Conferences and Workshops

Research Workshop

SRM UNIVERSITY · SRM INSITITUE OF SCIENCE AND TECHNOLOGY

Feb 2024

I explored key strategies for protecting innovations, understanding patent processes, and navigating legal landscapes.

Coding Workshop

Intel Unnati · SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Feb 2024

Skills

Programming Languages: Python, HTML, CSS, Machine Learning

Domain Knowledge: MongoDB, SQL, Next.js, Type-Script

Tools and Technologies: GITHUB, VSCode, Jupyter Notebook

Design and Simulation Tools: Canva, FIGMA

Areas of Interest: Full Stack

Languages

English [Professional Working Proficiency], Hindi [Native Proficiency], German [Limited Working Proficiency]
